

# BEAUTY SPA

At the beginning of every treatment, our beauty specialist will analyse the treatment needs of your skin so that she can tailor the treatment individually to your skin type and wishes. Every facial treatment includes cleansing, exfoliation, a treatment mask and eyebrow shaping. You can also choose from a relaxing massage (face including the throat, décolleté, nape of the neck and the head) or manual lymph drainage. Depending on your wishes, we will round off the treatment with a quick make-up. We also pamper your hands with a soothing hand massage. Our beauty specialist will gladly discuss an individual care plan with you so that you can continue the results of your treatment at home as well. We serve mineral water with every treatment.
