

# BEAUTY SPA

Discover our range of treatments for beautiful skin. Our beauty team will take care of you to improve the quality of your skin for a youthful, fresh appearance. We use IPL treatments to gently and cosmetically firm or smooth skin tissue and to reliably remove pigmented lesions (age and skin spots). We also treat cosmetic vascular lesions – telangiectasia/couperose skin, rosacea and large pores – and we improve skin complexion, from the anti-fatigue effect up to smoothing expression lines. High-risk laser treatments and surgical procedures for anti-ageing treatment are also a thing of the past. The precise frequency of hypoallergenic light energy has a gentle and positive cosmetic impact on different skin tissue structures.

## Medical Beauty Treatments

**IPL Pigment Treatment** € 75,00

Duration of treatment: 20 min. Pigmentation spots have many different causes, resulting from taking medication, hormonal changes or hereditary and external influences. Some colour components can be dissolved from the skin and removed by the light energy.

**IPL anti-aging upper lip** € 45,00

Duration of treatment: 10 min

**IPL anti-aging throat and décolleté** € 110,00

Duration of treatment: 30 min

**IPL anti-aging hands** € 60,00

Duration of treatment: 15 min

**Contour lifting** 1x € 99,00  
5x € 470,00

Modern beauty medicine also offers non-invasive methods to restore contour and youthfulness. A new combined procedure of radio frequency and ultrasound is particularly effective, pain-free and produces an amazing and very natural effect. The multiple layers and targeted heat application to the skin stimulate regeneration of the collagen fibres. The result is natural beauty thanks to tighter contours and fewer tiny wrinkles.

**Thalgo Ceutic fruit acid treatment** € 95,00

Evens out severe irregularities and restores radiance to the skin: Blotches fade significantly, making your skin tone appear smoother, clearer and more vibrant.

**HYA Complex Rejuvenating Serum** € 125,00

This serum infuses the skin with highly active ingredients to lastingly improve your complexion and increase the resilience of demanding skin. Combined with efficient techniques such as ultrasound, you will achieve a unique deep effect and lastingly improve the texture of your skin.

**Sapphire abrasion** € 42,00

An innovation in the area of microabrasion is the sapphire peel, which is applied manually and features a 3D treatment surface: Cornified skin cells can be targeted and removed. Your skin tone is instantly visibly improved, and your skin feels soft and smooth. The method is also suitable for sensitive skin.

### **Intensive oxygen treatment**

1x € 67,00  
5x € 300,00

A powerful support for cell regeneration, hyaluronic acid is enriched with concentrated oxygen by way of microapplication and made to penetrate the skin – targeting and plumping up laugh lines.

### **Ultrasound treatment**

€ 20,00

As a powerful supplementary anti-ageing treatment, ultrasound makes the ingredients penetrate even deeper into the skin, stimulating the formation of collagen and elastin.

### **Radio frequency treatment**

ab € 45,00

You can add radio frequency to any treatment to bring about an intense stimulation of collagen and elastin, giving you radiant skin in an instant. Radio frequency can be applied wherever elasticity is lost in the skin and targets one of the causes of ageing skin.
